## Parasitic Zoonoses

Retail price: 79,00 €  
Publication date: December 2008  
ISBN: 978-3-89993-047-4

### Authors:

Dr. Wieland Beck is a veterinary specialist (FTA) for parasitology and FTA for small animals. He combines his many years of professional experiences in the fields of research, teaching and practice.

Dr. Nikola Pantchev has a wealth of experience in the field of diagnostics of small animal and pet parasitoses.

### Market:

Small animal practitioners, domestic animal practitioners, zoo veterinarians, physicians, veterinary students

### Specifications:

Hardcover, 21,0 x 27,5 cm, approx. 152 pages, approx. 350 illustrations

### Contents:

A vast number of parasites can be transmitted between human and animal. This is why profound knowledge of epidemiology and the diagnostics of zoonoses are indispensable for veterinarians. With over 350 clinical and diagnostic illustrations, the photo text atlas at hand provides a unique picture library concerning parasitic zoonoses through food-supplying domestic animals, small animals, pets, birds as well as exotic animals.

The authors illustrate the complex infectious cycles and provide an overview of important epidemiological aspects. They take into consideration not only parasitoses indigenous with us, but also introduced pathogens and the increasingly more important "travel sicknesses". A separate chapter addresses parasites with humans. Case histories from everyday practice illustrate that zoonoses are a ubiquitous, important topic in every veterinary practice.

### Main selling points:

- Essential knowledge for all small animal practitioners: parasitic zoonoses through small animals and pets
- Over 350 clinical and diagnostic illustrations
- Unique picture library
- Graphic infectious cycles and human-animal cycles of pathogens
- All important parasitic travel sicknesses
- Many case histories

New!

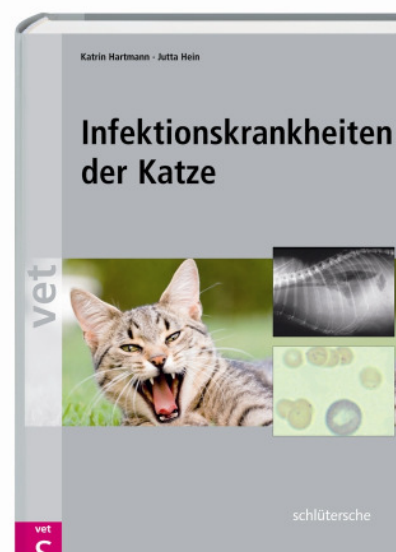

## Infectious Diseases in the Cat

Retail price: 129,00 €  
Publication date: 2008  
ISBN: 978-3-89993-746-8

### Authors:

Prof. Dr. Katrin Hartmann is a veterinary specialist for internal medicine and for clinical laboratory diagnostics. She heads the Medical Small Animal Clinic at Ludwig-Maximilians University in Munich, and is an internationally recognized specialist for infective diseases in the cat.

Dr. Jutta Hein is senior physician at the Medical Small Animal Clinic at Ludwig-Maximilians University in Munich.

### Market:

Small animal practitioners, veterinary students

### Specifications:

Hardcover, 21,0 x 27,5 cm, 400 pages, 180 illustrations

### Contents:

- Viral infections
- Bacterial infections
- Parasitic infections
- Fungal and algal infections
- Infectious differential diagnoses
- Frequent clinical and laboratory-diagnostic problems
- Inoculation

Finally there are answers to all important practical questions regarding infective diseases in the cat. This extraordinary guide provides answers to all questions which are posed to the veterinarian during the treatment of infected cats. The authors describe all important infective diseases step by step. The chapter headings are conceived as questions which every veterinarian knows. For instance: What is FIV? Which clinical symptoms appear? How can the diagnosis be made? What does the optimal therapy look like? Is there a danger for humans? The book answers all questions in depth and in a field-tested manner. Every sickness is additionally described through a brief profile which summarizes the most important facts. Clearly arranged diagnostic diagrams and detailed therapy tables conclude every chapter. Numerous illustrations illustrate symptoms as well as diagnostic and therapeutic measures. The book includes current information regarding inoculations and frequent clinical problems.

### Main selling points:

- Answers all practical questions regarding infective diseases in the cat
- New, very practically-oriented layout
- Clearly arranged "profiles" for every sickness
- Detailed diagnostic diagrams and therapy tables
- Current information regarding inoculation and frequent clinical problems

New and unique!

## Atlas of Diagnostic Imaging

Birds ♦ Small Mammals ♦ Reptiles

Retail price: German: approx. 139,00 €  
English: approx. 139,00 €  
Publication date: (German edition) March 2009  
(English edition) December 2009  
ISBN German: 978-3-89993-040-5  
ISBN English: 978-3-89993-049-8

### Authors:

Dr. Maria-Elisabeth Krautwald-Junghanns, Professor,  
University Leipzig  
Dr. Michael Pees, University Leipzig  
Dr. Sven Reese, University Munich  
Dr. Thomas Tully, Professor, LSU Baton Rouge

### Market:

Small animal practitioners, veterinary students

### Specifications:

Hardcover, 24,5 x 34,3 cm, approx. 400 pages, approx. 1500 illustrations

### Contents:

This atlas is, to date, a unique compilation of all imaging techniques used in the three classes of pets: birds, small mammals and reptiles. It is an ideal supplement to the presently available literature on imaging diagnostics for every small animal clinic.

Each of the three classes of pets is considered in a separate section of the book, so that relevant specific information and visual references can be rapidly consulted. Every section begins with the anatomical illustration of the relevant part of the body with respect to each of the individual diagnostic procedures. In the second part of the book, the most common pathological conditions are depicted according to organ system and discussed comparatively. This comparative presentation enables a quick and correct diagnosis in conjunction with using the most suitable diagnostic techniques. All radiographic, sonographic, CT and MRI images are clearly labelled. With its ca. 1500 illustrations, this atlas is an unrivalled diagnostic archive for small animal practice.

### Main selling points:

- Birds, small mammals and reptiles: the three classes of pets are considered together for the first time in a single book on imaging techniques
- All modern imaging techniques are considered: radiography, sonography, CT and MRI
- Newest state-of-the-art pictures
- Colour-coded, easily understood labelling of the figures

New!

## Neonatology in the Dog

Retail price: 69,00 €  
Publication date: 2008  
ISBN: 978-3-89993-037-5

### Authors:

Prof. Dr. Axel Wehrend is the Head of the Department of Clinical Reproductive Medicine, Faculty of Veterinary Science, Giessen University, Germany.

### Market:

Small animal practitioners, veterinary students, dog breeders

### Specifications:

Hardcover, 19,5 x 26,0 cm, 224 pages, 100 photos

### Contents:

This book comprehensively presents for the first time the state-of-the-art clinical knowledge about the care and supervision of the newborn puppy.

The book contains all the important practical aspects of neonatal medicine: from embryonal development to birth, and to an age of eight weeks post-partum. The authors have described all the important clinical investigation techniques, diseases and therapy measures. Colored photographs and clearly arranged tables illustrate the normal development of the puppy as well as the diseases and their diagnosis and therapy.

- Pregnancy and parturition
- Physiological and anatomical characteristics in the newborn puppy
- Clinical examination of the puppy
- Vaccination and deworming (breeding bitches and puppies)
- Organization of dog breeding

### Main selling points:

- Up-to-date and state-of-the-art expert knowledge on neonatology in the dog – combined for the first time in a single volume
- Everything about the care and supervision of the newborn puppy
- Clinical examination, diseases and therapy from birth to the age of weaning
- Care and supervision of the pregnant and lactating bitch
- Information about dog breeding

New!

## Small Animal Gastroenterology

English and Italian language rights are not available.

Retail price: 129,00 €  
Publication date: 2008  
ISBN: 978-3-89993-027-6

### Editor:

Jörg M. Steiner, DVM, PhD, DAVIM, DECVIM-CA,  
Director of GI Laboratory, Texas A&M University, USA

### Authors:

This book combines a unique group of authors. The book has been written by a total of 35 authors from 8 countries. All authors are experts in their field and combine a vast experience in both academia and private practice.

### Market:

Small animal practitioners, veterinary students, small animal interns, residents in small animal internal medicine, graduate students in veterinary sciences

### Specifications:

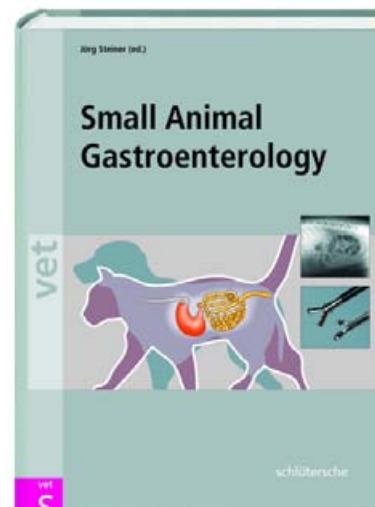

Hardcover, 21,0 x 27,4 cm, 384 pages, 281 illustrations

### Contents:

The new standard work for small animal gastroenterology. This book attempts to capture the current state of the art by assembling a large number of authors from many countries with a variety of backgrounds. This allows each author to focus on their area of special expertise. Wherever possible the authors were guided by evidence-based medicine. The authors discuss the current standard of diagnosis and care for small animal patients with gastrointestinal disease. The book has two main sections. The first section covers the diagnosis of gastrointestinal disorders. The second section of the book focuses on specific diseases of the gastrointestinal tract. Each component of the GI tract is discussed separately with another section focusing on diseases that affect more than one organ of the gastrointestinal tract. For each component of the GI tract there are special sections that describe clinically pertinent anatomical details as well as the basic physiology of that component, with the larger part of the section dedicated to a comprehensive review of the different diseases that can affect that component.

### Main selling points:

- Concise enough and well-illustrated for veterinary students and veterinary practitioners
- Detailed enough and well-referenced for veterinary specialists and those in training to be specialists
- High-resolution color figures that help to illustrate the text
- Contains chapters that focus on the clinical approach to patients with certain clinical signs
- Contains chapters that discuss diseases of the gastrointestinal tract in detail
- Contains chapters on the physiology of the GI tract
- Each author covers an area of unique expertise
- International rather than local perspective

New!

## Small Animal Cardiology

Retail price: 114,00 €  
Publication date: 2008  
ISBN: 978-3-89993-019-1

### Authors:

Dr. Ralf Tobias is specialist for small animals, he runs a practice for cardiology in Hanover, Germany. He founded and chairs the German Veterinary Cardiology Group.

Dr. Marianne Skrodzki, Assistant Professor at the University of Berlin, is specialized in small animals and cardiology and has a small animal practice with a focus on cardiology in Berlin, Germany

Dr. Matthias Schneider is Assistant Professor at the Small Animal Clinic of the Justus-Liebig-University, Giessen

### Market:

Veterinarians in small animal practice, veterinary students

### Specifications:

Hardcover, 21,0 x 27,4 cm, 278 pages, 417 illustrations  
Audio CD-ROM with cardiac auscultation

### Contents:

The concise and image oriented design of the book offers the veterinarian a clinically oriented concept and answers every day questions in clinical cardiology of the dog and cat. Due to the use of didactic symbols all relevant cardiopathies are systematically presented.

The first section of the book covers the basics of general cardiology: Clinical examination of the cardiac patient, ECG, x-ray examination of the heart, sonocardiography, blood pressure measurement and laboratory studies. The second section presents the special cardiology in detail. All relevant cardiac disorders and deformations are presented. This facilitates an overview on differential diagnoses as well as the dialogue with colleagues and pet owners. Separate chapters cover the usage of cardiotherapeutics and the cardiology of small mammals

### Main selling points:

- Cardiology – clear, concise and clinically oriented
- All relevant cardiac diseases in dogs and cats
- Precise presentation of the cardiologic examination
- Cardiac auscultation on CD-ROM!
- Concise and image oriented design facilitates clinical understanding
- About 350 pictures illustrate diagnostic procedures, symptoms and therapy

## Compendium of Poultry Diseases

Retail price: 29,90 €  
Publication date: 2005 (6<sup>th</sup> edition)  
ISBN: 978-3-87706-744-4

### Editors:

Prof. Otfried Siegmann was director of the Clinic for Poultry of the Foundation School of Veterinary Medicine Hanover for many years and is founder of this compendium.

Prof. Ulrich Neumann is director of the Clinic for Poultry of the Foundation School of Veterinary Medicine Hanover.

### Authors:

With contributions of the leading specialists of all German-speaking veterinary schools, from research facilities and practice.

### Market:

Veterinary students, veterinarians in practice, in administrative offices, investigative departments and institutes as well as all persons working in the primary production of poultry and down-stream sectors (poultry keeping, processing and food production)

### Specifications:

Hardcover, 17,3 x 24,6 cm, 376, 31 illustrations, 74 tables

### Contents:

The 6<sup>th</sup> edition of this classic on the care and treatment of poultry has been revised completely and updated with the current scientific standard of knowledge. In recent years major changes have taken place in the area of poultry keeping and care – partly as a result of public discussions on animal and consumer protection. This compendium features concise and practical updates on legislation, e. g. in the areas keeping, drug use, animal disease legislation and animal protection. Furthermore, prophylaxis, propedeutics as well as all important infectious and non-infectious poultry diseases are illustrated in detail. In each chapter both care for the individual animal as well as the care for herds are addressed.

Due to its compact knowledge transfer this book is a valuable source of information for all practicing veterinarians working in the broad subject of poultry diseases. For students this manual will be a companion to lectures and for exam preparation.

### Main selling points:

- Proved standard compendium on poultry diseases
- Completely revised and updated
- Care for individual animals and herds
- Current legislation on poultry keeping
- For practice and study
- Valuable study aid for exams

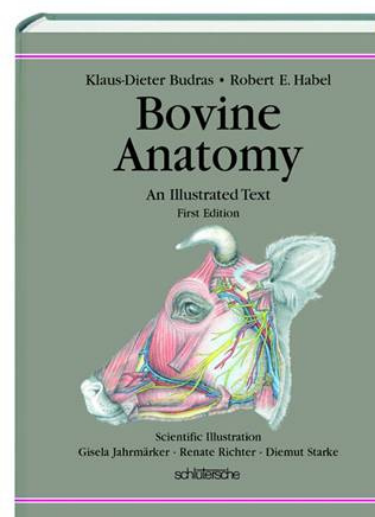

## Bovine Anatomy

English, Italian, Japanese, and Turkish language rights are not available.

Retail price: German: 76,00 €, English: 82,00 €  
Publication date: (German edition) 2002  
(English edition) 2003  
ISBN German: 978-3-89993-024-5  
ISBN English: 978-3-89993-002-3

### Authors:

Klaus-Dieter Budras, DVM., PhD., University of Berlin, Germany  
Robert E. Habel, DVM, PhD., Cornell University Ithaca, USA

### Market:

Veterinary students, large animal practitioners, veterinary and meat hygiene authorities

### Specifications:

Hardcover, 24,5 x 34,3 cm, about 184 pages, 51 colour plates, several illustrations, radiographs, drawings and photographs

### Contents:

This atlas gives a detailed and comprehensive description of the anatomy of the cattle. It covers general topographic anatomy including detailed tabulated data on neurology, myology, arthrology and lymphology. Full-sized drawings and radio-graphs illustrate details of main clinical importance. See also the atlas on Anatomy of the Dog and the atlas on Anatomy of the Horse.  
Supplement: Clinical anatomy.

### Main selling points:

- Standard Atlas for students
- Applied anatomy for the veterinary practitioner
- Excellent reference source for experts
- Unique drawings of all body regions and important organ systems of cattle
- Full-page illustrations with precise anatomical explanation

### Press commentaries:

“A welcome and needed addition to this superb set of textbooks... the strengths are its topographic illustrations and descriptions... the authors have included an excellent chapter on BSE with a clear descriptive discussion of the diseases.”  
American Veterinary Medical Association – JAVMA

New edition!

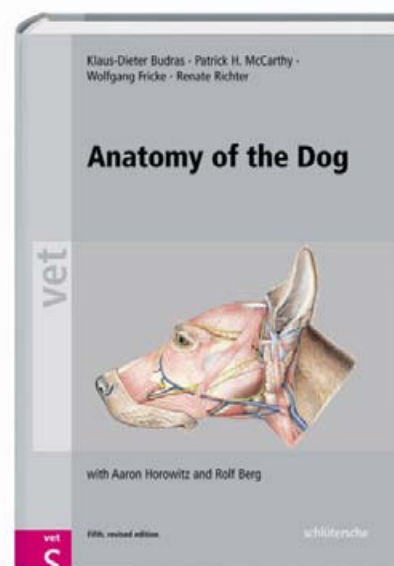

## Anatomy of the Dog

English, Italian, Japanese, Polish, Spanish, and Turkish language rights not available.

Retail price: German: 76,00 €, English: 86,00 €  
Publication date: 2007 (8<sup>th</sup> German edition)  
2007 (5<sup>th</sup> English edition)  
ISBN German: 978-3-89993-012-2  
ISBN English: 978-3-89993-018-4

### Authors:

Klaus-Dieter Budras, DVM., PhD., University of Berlin, Germany  
P. H. McCarthy, DVM., PhD., University of Sydney, Australia  
Aaron Horowitz, DVM., PhD., JD., Ross University, St. Kitts, USA  
Rolf Berg, Dr. med. vet, Dr. med. vet. habil., University Berlin, Germany  
Wolfgang Fricke, Renate Richter, Medical Illustrators, Berlin, Germany

### Market:

Veterinary students, veterinary surgeons

### Specifications:

Hardcover, 24,5 x 34,3 cm, 224 pages, many large-sized colour plates including several illustrations, radiographs, drawings and photographs

### Contents:

This atlas gives a detailed and comprehensive description of the anatomy of the dog. It covers general topographic anatomy including detailed tabulated data on neurology, myology, arthrology and lymphology. Full-sized drawings and radiographs illustrate details of main clinical importance.

New section on computed tomography.

See also the atlas on Anatomy of the Horse and Bovine Anatomy.

### Main selling points:

- Standard atlas for Students
- Excellent reference source for experts
- Applied anatomy for the veterinary practitioner

### Press commentaries:

"If the practicing veterinarians have not bought an anatomy book since veterinary school, this book is highly recommended; this is a book that one would be proud to use as a teaching tool with clients."

American Veterinary Medical Association – JAVMA

New edition!

## Anatomy of the Horse

English, Dutch, Japanese, Spanish, and Turkish language rights not available.

Retail price: German: 76,00 €, English: 82,00 €  
Publication date: November 2008 (6<sup>th</sup> German edition)  
November 2008 (5<sup>th</sup> English edition)  
ISBN German: 978-3-89993-043-6  
ISBN English: 978-3-89993-044-3

### Authors:

Klaus-Dieter Budras, D.V.M., Ph.D., Professor of Anatomy,  
University of Berlin, Germany  
Sabine Röck, Medical Illustrator, Berlin  
W.O. Sack, DVM, Ph.D., Professor em., Cornell University

### Market:

Veterinary students, veterinarians, horse trainers

### Specifications:

Hardcover, 24,5 x 34,3 cm, 208 pages, 56 large-sized colour plates including several illustrations, radiographs, drawings and photographs

### Contents:

Anatomy of the Horse has been accepted as a highly successful text-atlas of equine anatomy. The chapters on functional anatomy of this present 5<sup>th</sup> edition have been totally revised and include new chapters on the eye, abdomen, female reproduction and ultrasonography and especially orthopaedics.

- Fully illustrated with colour line diagrams, including unique three-dimensional cross-sectional anatomy, together with radiographs and ultrasound scans
- Includes topographic and surface anatomy
- Tabular appendices of relational and functional anatomy

Already acknowledged by students and teachers as an essential resource for learning and revision, this book will also be a valuable reference for veterinary practitioners and for those who own and value horses. See also the atlas on Anatomy of the Dog and Bovine Anatomy.

### Main selling points:

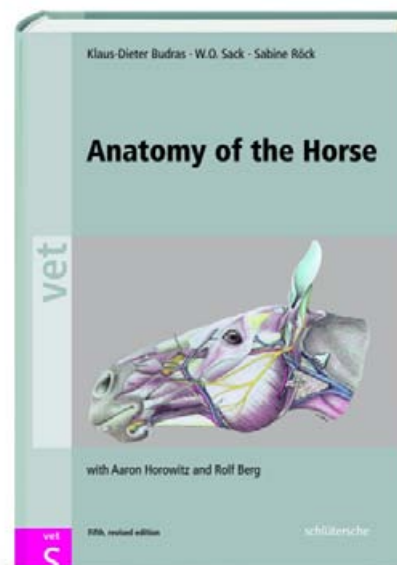

- Standard Atlas for students, excellent reference source for experts, applied anatomy for the veterinary practitioner

### Press commentaries:

“The aim of the authors has been admirably achieved. The textbook is already acknowledged as an essential resource for students and teachers and will be an essential reference book for veterinary practitioners and horse lovers in the English-speaking world.”

American Veterinary Medical Association – JAVMA

“A valuable reference book for students of anatomy and surgery. The practising surgeon should find many of the descriptions and diagrams extremely useful.”  
Irish Veterinary Journal

## Atlas of Small Animal Surgery

Soft Tissue Surgery

Italian, Chinese, Japanese and Korean language rights not available.

Retail price: 154,00 €  
Publication date: 2000 (2<sup>nd</sup> edition)  
ISBN: 978-3-87706-389-7

### Authors:

Thomas DaVid, DVM, PhD, Ingrid Kasper, Markus Kasper, DVM  
The authors are veterinary surgeons in private practice in Vienna, Austria.

### Market:

Veterinarians in small animal and mixed practices, clinicians, veterinary students

### Specifications:

Hardcover, 24,5 x 34,3 cm; 408 pages and 1383 illustrations

### Contents:

The book describes the theoretical basis and general aspects of surgery (instruments, basic techniques, head, neck, thorax, abdomen, urogenital tract). New findings and experiences as well as firmly established techniques increased the value of this revised edition for veterinary practice. The book will contain various new surgical methods and techniques; elaborate illustrations of the topographic anatomy make visualisation of the described techniques easier.

### Main selling points:

- Completely revised edition of the successful atlas
- Includes numerous new operations and surgical techniques
- Descriptions of the techniques are accompanied by illustrations showing step by step the surgery sequence
- Includes completely new drawings of excellent quality
- Practical instructions are given for more than 350 operations
- Valuable work of reference

# Manual Lymph Drainage in the Horse

Comparative lymphology, indication, prevention

Retail price: 69,00 €  
Publication date: 2005  
ISBN: 978-3-89993-006-1

## Authors:

Prof. Dr. Dirk Berens v. Rautenfeld is a veterinarian, anatomist and equestrian. He has been active in lymphologic research and teaching in human and veterinary medicine for more than 20 years and is regarded as the „inventor“ of manual lymph drainage in the horse. Dr. Christina Fedele is a veterinarian and equestrian. After years in equine practice she is intensely involved in the training of MLD-therapists for horses.

## Market:

Horse practitioners, lymphologists, physical therapists, horse owners

## Specifications:

Hardcover, 19,5 x 26,0 cm, 192 pages, 144 illustrations, 22 tables

## Contents:

Finally a technically substantiated textbook on the use of manual lymph drainage in the horse is available. This book provides a practical overview of the function and significance of the lymphatic system and a comprehensive, comprehensible and richly illustrated presentation of the fundamentals and areas of application, treatment strategies as well as indications of manual lymph drainage in the horse. Knowledge of the lymphatic system and manual lymph drainage in the horse is a must for all practicing veterinarians. As the reference book of manual lymph drainage this book is also targeted at physical therapists trained on horses as well as horse owners interested in treatment methods.

Why use manual lymph drainage (MLD) in the horse?

- Highly successful treatment!
- Great applicability for palliative treatment of diseases of tendons, muscles and joints
- Involvement of the lymphatic system in a striking number of diseases in the horse – new therapeutic consequences are necessary
- MLD has no side-effects and is not liable to doping-regulations

## Main selling points:

- First substantiated presentation of manual lymph drainage in the horse
- Provides know-how for the prevention and treatment of diseases of the lymphatic system
- Clear description of important maneuvers
- Reference book on manual lymph drainage für veterinarians and physical therapists
- Explains the basics of lymph drainage therapy for equestrians and horse owners

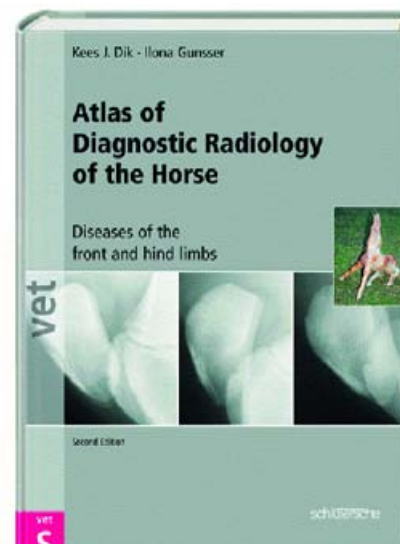

## Atlas of Diagnostic Radiology of the Horse

English and Spanish language rights not available.

Retail price: German: 144,00 €, English: 144,00 €  
Publication date: 2002 (2<sup>nd</sup> German edition)  
2002 (2<sup>nd</sup> English edition)  
ISBN German: 978-3-87706-661-4  
ISBN English: 978-3-87706-651-5

### Authors:

Kees Jan Dik, DVM, PhD, is Diplomate of the European College of Veterinary Diagnostic Imaging (ECVDI) and professor em. of diagnostic imaging at the Veterinary Faculty of the University of Utrecht, the Netherlands and the University of Gent, Belgium. He is consulting equine radiologist at the Veterinary Center Someren, the Netherlands. Ilona Gunsser, DVM, PhD, Munich, Germany.

### Market:

Veterinarians in equine or mixed practices, veterinary students

### Specifications:

Hardcover, 24,6 x 34,3 cm, 300 pages, 784 illustrations

### Contents:

A radiographic atlas common and uncommon features of the various bone and joint diseases of the equine limbs. The text offers a clear description of the radiographic findings and the radiographic diagnosis or differential diagnosis. The clinical significant is defined and additional information noted if necessary. Schematic drawings are added if necessary to facilitate the observation of small, obscure details and to summarize "characteristic" lesions. The new illustrations cover all parts of the equine limbs with emphasis on the various lesions of the foot, fetlock abnormalities, carpal disorders as well as common and uncommon hock and stifle lesions.

### Main selling points:

- First comprehensive atlas of diagnostic radiography
- The first edition, published 1987–88, based on the experience of over 25.000 investigations and containing 399 illustrations.
- The second edition contains 191 new additional illustrations selected from approximately 20.000 case studies performed during the last decade.

### Press commentaries:

"I heartily recommend this new book to every equine practitioner, and in every radiology department of a veterinary hospital."

Israel Journal of Veterinary Medicine

## Parasitology in Exotic Pets

Small mammals ♦ birds ♦ reptiles ♦ bees

Retail price: 99,00 €  
Publication date: 2006  
ISBN: 978-3-89993-017-7

### Editor:

Dr. Wieland Beck is a veterinary specialist (FTA) for parasitology and FTA for small animals. He combines his many years of professional experiences in the fields of research, teaching and practice.

Dr. Nikola Pantchev has a wealth of experience in the field of diagnostics of small animal and pet parasitoses.

### Market:

Veterinarians in small animal practice, veterinary students

### Specifications:

Hardcover, 21,0 x 27,5 cm, 328 pages, 582 illustrations, numerous tables

### Contents:

Small mammals – birds – reptiles – bees

Finally a comprehensive and well illustrated reference covering all clinically relevant internal and external parasites in small pets. The book is a reliable guide for diagnostic procedures and clinically approved therapy. Due to the broad spectrum of parasites occurring in small pets it is not easy for the veterinarian to get a good overview. Furthermore, especially in small pets antiparasitic therapy often is confusing. Species depending effectiveness and approval of drugs make their application even harder. This book presents the necessary facts and unique pictures to reliably diagnose parasitic agents. It combines clinical and academic experience to become a reference concerning the most important parasitic diseases in the most common small mammals, birds and reptiles presented in the veterinarian practice. A separate chapter covers the parasitoses of bees.

### Main selling points:

- More than 580 pictures form a unique archive for the diagnosis of parasites and diseases
- Drawings visualize parasitological pathomechanisms
- Reliable information for the treatment of parasitoses
- Important completion of your „small-pets-library“
- Experts summarize and evaluate the knowledge accessible in literature
- Case reports from every day consultation

## Diseases of Exotic Pets

English, Italian, and Polish language rights not available.

Retail price: 149,00 €  
Publication date: 2008 (7<sup>th</sup> edition)  
ISBN: 978-3-89993-038-2

### Editors:

The editors are renowned specialists in the field of exotic pet diseases:  
Prof. Dr. Michael Fehr, Small Animal Clinic, Foundation School of Veterinary Medicine Hanover  
Dr. Lutz Sassenburg, veterinarian in practice in Berlin  
Prof. Dr. Peernel Zwart, Utrecht

### Authors:

International team of authors from Germany, Switzerland and The Netherlands.

### Market:

Veterinarians in small animal and mixed practices, veterinary students, zoologists, biologists

### Specifications:

Hardcover, 21.0 x 27.5 cm, 1028 pages, 850 illustrations, 141 tables

### Contents:

This standard book on the care and treatment of exotic pets has been revised completely and updated. In a modern layout this new edition is continued in the proved systematic concept. The book provides the basics on care, nutrition and special physiologic features of the various species. It is the reference book for all relevant diseases of exotic pets. Concise info boxes provide quick orientation for each species: physiologic, haematologic and clinical chemistry data as well as drug application. Extensive drug tables conclude each chapter. Numerous new figures illustrate typical clinical pictures as well as examination methods and therapeutic measures. Division into 25 chapters remains oriented on the patient spectrum seen in small animal practice. An additional chapter furnishes information on invertebrates.

The new team of editors combines updated specialist expertise from university and practice. All authors are renowned experts from Germany, the Netherlands and Switzerland.

### Main selling points:

- Proved standard book on exotic pet diseases
- All important exotic pets in one book!
- Completely revised and updated
- New concise info boxes for reference values and basic knowledge
- Detailed overview of drugs for all species
- Expert knowledge for practice

## Pocket Manual Small Animal Assistance Volume 1: Assistance in Practice

Spanish language rights not available.

Retail price: 29,90 €  
Publication date: 2005  
ISBN: 978-3-87706-697-3

### Authors:

Dr. Thomas Steidl is a small animal veterinarian and owner of a small animal hospital in Tübingen.

Dr. Friedrich Röcken, Diplomate of the European College of Veterinary Surgeons, is a small animal veterinarian (specialty surgery). He runs a small animal hospital in Schleswig.

The author team is made up of practicing veterinarians of different specialties. All authors are experienced in training assistants and veterinary nurses.

### Market:

Veterinary students, clinic assistants, veterinary nurses, small animal practitioners

### Specifications:

Soft plastic cover, 11,0 x 18,0 cm, 252 pages, 53 illustrations

### Contents:

Everything you need to know about assisting in practice in pocket size! This practical manual contains all relevant facts for daily work in small animal practice: Basics on handling of small animals and exotics, easily comprehensible descriptions of important maneuvers as well as diagnostic and therapeutic techniques, tips on handling specific species as well as important data of physiology and keeping. A comprehensive chapter on drug therapy provides the fundamentals for usage and effects of the most important drugs in small animal practice.

This book is meant for all students of veterinary medicine and assistants in small animal practice. It is the practical manual for all veterinary nurses who want to work independently, professionally and competently.

- Assisting in practice for dogs, cats and small mammals
- Assisting in practice for birds and reptiles
- Handling and fixation
- Basic techniques for evaluation of bodily functions
- Drug application
- Nutrition
- Preparation and assistance for diagnostic techniques
- Pharmacology
- Hygiene in practice

### Main selling points:

- Essentials of assisting in practice in pocket size
- Clear descriptions of diagnostic and therapeutic techniques
- Tips and tricks for confident assistance in practice
- All important data for dogs, cats and exotic pets

## **Pocket Manual Small Animal Assistance Volume 2: Assistance in Surgery**

Spanish language rights not available.

Retail price: 39,90 €  
Publication date: 2005  
ISBN: 978-3-87706-698-0

### **Authors:**

Dr. Thomas Steidl is a small animal veterinarian and owner of a small animal hospital in Tübingen.

Dr. Friedrich Röcken, Diplomate of the European College of Veterinary Surgeons, is a small animal veterinarian (specialty surgery). He runs a small animal hospital in Schleswig.

The author team is made up of practicing veterinarians of different specialties. All authors are experienced in training assistants and veterinary nurses.

### **Market:**

Veterinary students, clinic assistants, veterinary nurses, small animal practitioners

### **Specifications:**

Soft plastic cover, 11,0 x 18,0 cm, 336 pages, 106 illustrations

### **Contents:**

A well-rehearsed surgical team is essential for successful surgery. This manual provides the necessary know-how and many tips from everyday practice for optimal accomplishment of all tasks. The authors supply fundamentals of anesthesiology, different anesthetic methods and anesthesia monitoring under consideration of species specific characteristics. Surgical hygiene, surgical assistance, wound closure, wound care and bandaging are illustrated in detail. The book offers newest insights on wound healing for modern surgical management. Basics of first aid and emergency management make this pocket manual an indispensable companion for on-call duty. The pocket manual for professional surgical assistance in small animal practice.

- Surgical hygiene
- Sterilisation and disinfection
- Preparation of surgery
- Surgical assistance and wound closure
- Wound care and bandaging
- Emergency equipment and critical care
- First aid

### **Main selling points:**

- Essentials of surgical assistance in pocket size
- Up-to-date know-how for modern surgical management
- Newest insights on wound healing

## Virus Infections of Domestic Animals

Retail price: 29,90 €  
Publication date: 2003 (2<sup>nd</sup> edition)  
ISBN: 978-3-87706-745-1

### Editors:

Bernd Liess, DVM, PhD, former head of Institute of Virology,  
Veterinary School Hanover  
Oskar-Rüger Kaaden, DVM, PhD, head of Institute of Microbiology  
and Virology, University of Munich, Veterinary Faculty

With 7 contributing authors, specialized in different fields  
of veterinary virology.

### Market:

Students, veterinary practitioners (small animals, large animals, fishes)  
veterinarians in animal welfare and epizootics control

### Specifications:

Hardcover, 17,3 x 24,5 cm, 180 pages

### Contents:

All clinical relevant virus diseases of domestic animals are described in terms of etiology, clinical and morphological symptoms, diagnostics, prevention and therapy. The book follows the current EU legal rights for epizootic control.

Every veterinarian who is involved in Animal Welfare of domestic animals including fishes finds the relevant facts in this book.

### Main selling points:

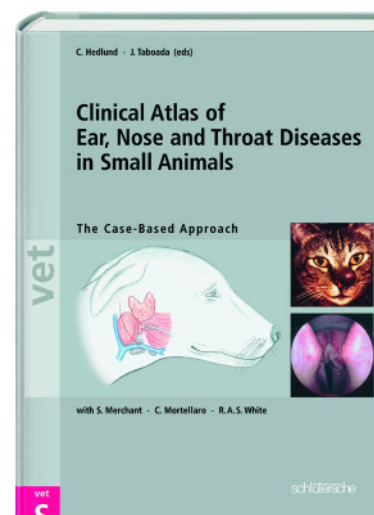

- All diseases of the current EU veterinary rules
- Well-structured information on all clinical relevant virus diseases
- Up-to-date information on virus diagnostics
- Key facts on prevention and therapy

# Clinical Atlas of the Ear, Nose and Throat Diseases in Small Animals

The Case-Based Approach

English, Spanish, Italian, Korean, and Japanese language rights not available.

Retail price: German: 88,00 €, English: 102,00 €  
Publication date: 2002 (German edition)  
2002 (English edition)  
ISBN German: 978-3-87706-662-1  
ISBN English: 978-3-87706-621-8

## Editors:

Cheryl Hedlund, DVM, MS, Diplomate, American College of Veterinary Surgeons, USA  
Joseph Taboada, DVM, Diplomate, American College of Veterinary Internal Medicine, USA

## Contributors:

Cheryl Hedlund, DVM, MS, Louisiana State University, Baton Rouge, USA  
Sandra Merchant, DVM, Louisiana State University, Baton Rouge, USA  
Carlo Mortellaro, DVM, PhD, University of Milano, Italy  
Joe Taboada, DVM, Louisiana State University, Baton Rouge, USA  
Richard White, DVM, PhD, Cambridge University, UK

## Market:

Veterinarians in small animal practices and mixed practices, veterinary students

## Specifications:

224 pages, Hardcover, 21,0 x 27,5 cm, 353 photographs, 60 4c drawings, 35 tables

## Contents:

Ear and Nasal Diseases – Laryngeal Diseases – Tracheal Diseases – Oral Diseases – Pharyngeal Diseases

The authors have written each chapter with a brief introduction, a series of cases and a discussion identifying other possible conditions which may affect the area. The reader is encouraged to use each case as a self-assessment and learning opportunity. After reading the signalment and history for each case the readers should ask themselves these questions: "What do I think this animal's problem is?" and "What would I do next?" The reader should then read each segment of the case to learn how the authors proceeded. Each case is accompanied by photographs to enable the practitioner to more easily transfer the knowledge they gain to their veterinary patients with similar problems. This atlas is designed for the progressive practitioner or student as a guide to the clinical diagnosis and management of problems affecting the ears, upper respiratory tract, oral cavity and pharynx. It does not include information or problems involving the eyes, esophagus, nervous system or endocrine system.

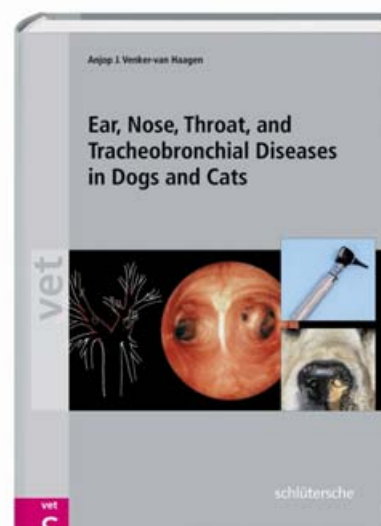

## Main selling points:

- Comprehensive guide to small animal patients with Ear, Nose and Throat problems
- Combines practical orientated case studies with supplementary and detailed information on the subject
- No comparable title available
- Instructive step-by-step drawings of head and neck surgery
- Superb colour illustrations on different surgical or diagnostic procedures

## Ear, Nose, Throat, and Tracheobronchial Diseases in Dogs and Cats

Korean language rights not available.

Retail price: German: 79,00 €, English: 89,00 €  
Publication date: 2006 (German edition)  
2005 (English edition)  
ISBN German: 978-3-89993-016-0  
ISBN English: 978-3-87706-635-5

### Author:

Anjop J. Venker-van Haagen, DVM, PhD, DECVS  
Former Associate Professor of Veterinary Ear Nose and Throat Diseases, Faculty of Veterinary Medicine, Department of Clinical Sciences of Companion Animals, Utrecht University

### Market:

Veterinarians in practice, veterinary students, teachers and researchers

### Specifications:

Hardcover, 19,5 x 26,0 cm, 248 pages, 182 illustrations

### Contents:

Ear – Nose and Nasal Sinuses – Pharynx – Larynx – Trachea and Bronchi – Cranial Neuralgias and Facial and Trigeminal Paralysis

This is the first textbook to provide a complete overview of all ENT diseases including such problems as inflammation of the outer ear, deafness, nasal discharge, swallowing disorders, and cough.

Six chapters give key information on functional considerations, aetiology, clinical signs, diagnosis, and therapy of ENT disorders. Special diagnostic and imaging techniques are also described in detail.

About 180 top quality illustrations emphasize specific characteristic features of the diseases and supplement the techniques described in the text.

This unique textbook will provide an up to date and invaluable practical resource for vets, teachers, researchers and students alike.

### Main selling points:

- The first textbook to give a complete overview of all ENT diseases
- Expanding subject in small animal medicine
- Author is one of the leading specialists in ENT-Diseases in companion animals
- Up-to-date diagnosis techniques and treatment
- More than 180 top quality illustrations emphasize and supplement the specific features of the diseases and disorders, examination methods, and therapy
- Clear structure guarantees easy access to all information

New edition!

## Atlas and Textbook of Small Animal Neurology

With CD-ROM on neurological diagnostic procedures

Polish, Czech, Japanese and Slovak language rights not available.

Retail price: German: 149,00 €, English: 135,00 €

Publication date: 2007 (2<sup>nd</sup> German edition)  
2009 (English edition)

ISBN German: 978-3-89993-035-1

ISBN English: 978-3-89993-026-9

### Editor:

André Jaggy, DVM, PhD, professor of neurology and head of the department at the University of Berne, Switzerland

### Authors:

An author team of international specialists in neurology

### Market:

Veterinary students, small animal practitioners

### Specifications:

Hardcover, 21,0 x 27,5 cm, 528 pages, 456 illustrations, incl. 193 4-c-illustrations, 74 tables, 12 diagrams

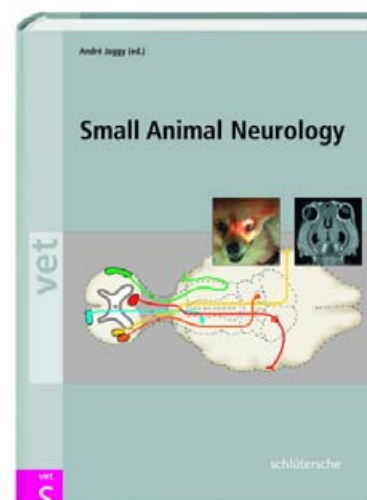

### Contents:

The book gives a comprehensive review of small animal neurology for all clinical problems. The general part presents detailed information on neurologic examination procedures, neuropathology and genetic disorders. Individual chapters on clinical characteristics in the areas laboratory tests, anesthesiology, radiology and electrodiagnostics, rehabilitation, pharmacology and surgery provide a good introduction to practically relevant fundamentals of neurology. The special part deals with specific neurologic diseases sorted according to their location and offers concrete information on diagnosis and treatment.

The CD-ROM demonstrates neurologic examination procedures in detail and presents selected neurologic cases – a valuable didactic medium for self-study.

### Main selling points:

- Small animal neurology for all clinical problems
- Comprehensive presentation of neurologic diagnostics and treatment
- Practical approach to all relevant neurologic diseases
- Extensive and graphic illustrations
- CD-ROM with film sequences on neurologic examination and with clinical cases

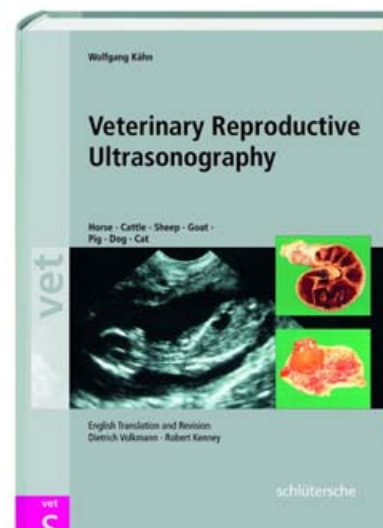

# Veterinary Reproductive Ultrasonography

Horse ♦ Cattle ♦ Sheep ♦ Goat ♦ Pig ♦ Dog ♦ Cat

Arabic, English and French language rights not available.

Retail price: German 69,00 €, English: 69,00 €  
Publication date: 2004 (2<sup>nd</sup> German edition)  
2004 (English edition)  
ISBN German: 978-3-89993-004-7  
ISBN English: 978-3-89993-005-4

## Author:

Wolfgang Kähn, DVM, PhD, University of Zürich, Switzerland  
English-edition: Bob Kenney, DVM, PhD, Professor, University of Philadelphia,  
School of Veterinary Medicine, USA; Dietrich Volkmann, BVSc, MMed Vet (Gyn),  
University of Pretoria, Veterinary Faculty, South Africa

## Market:

Large animal and small animal practitioners, clinicians, veterinary students

## Specifications:

Hardcover, 19,2 x 26 cm, 256 pages, 397 illustrations (36 four-colour prints)

## Contents:

The book is a valuable guide on reproductive ultrasonography of domestic animals. Most common indications for ultrasonography, gynecologic and obstetrical examination is emphasized. The pregnant and non-pregnant uterus, pathologic changes of the uterus as well as other sonographic findings are described and explained for the most common species of domestic animals. Ultrasonography can provide important information on the possible therapeutical range.

## Main selling points:

- Introduction into and reference work for the interpretation of ultrasonography in gynecologic and obstetrical examination
- Nearly 400 top-quality illustrations with in-formative legends
- An experienced veterinary practitioner and clinician is summarizing his knowledge

## Diseases of Exotic Birds

(CD-ROM available)

Psittacines ♦ Pigeons ♦ Passariformes

Retail price:

(book with CD-ROM): 45,00 €

Publication date: 2006 (3<sup>rd</sup> edition)

ISBN (book with CD-Rom): 978-3-89993-025-2

### Editors:

Erhard F. Kaleta, DVM, PhD, University of Giessen, Germany

Maria-Elisabeth Krautwald-Junghanns, DVM, PhD, University of Leipzig, Germany

### Authors:

Authored by Avian Specialists of all Veterinary Schools in Germany, Austria and Switzerland.

Mohamed Hafez, DVM, PhD, University of Berlin; Germany

Jean-Michel Hatt, DVM, University of Zurich, Switzerland

Rüdiger Korbel, DVM, PhD, University of Munich, Germany

Norbert Kummerfeld, DVM, University of Hanover, Germany

Ulrich Neumann, DVM, PhD, University of Hanover, Germany

Alexandra Scope, DVM, University of Vienna, Austria

### Market:

Veterinary Students, small animal practitioners, public veterinarians

### Specifications:

Hardcover, 17,3 x 24,5 cm, about 356 pages, about 50 tables, line drawings

### Contents:

- Clinical examination, Techniques
- Prophylaxis
- Diagnosis
- Therapy
- Non-infective diseases
- Infective diseases
- Parasitoses
- Bacterial Infections
- Viral Diseases

### Main selling points:

- Standard textbook for students and practitioners
- All basic information on husbandry, handling, reproduction and diseases of exotic birds
- Separate chapter and tables on medication
- Authored by experts from 6 different Veterinary School

## Compendium of Veterinary Surgery

Retail price: 39,00 €  
Publication date: 2003  
ISBN: 978-3-87706-743-7

### Authors:

Martin Kramer, DVM, PhD, head of the Dpt. of Veterinary Surgery,  
University of Giessen

About 30 authors from veterinary schools or private practice from  
Germany, Austria, Switzerland and Belgium.

### Market:

Veterinary students, general veterinary practitioner

### Specifications:

Hardcover, 17,3 x 24,5 cm, 352 pages, 85 line drawings

### Contents:

This is a new standard for clinical education of veterinary students. The book contains all basics of veterinary surgery, supplemented with up-to-date facts and state-of-the-art surgery procedures. It is therefore written also for the general veterinary practitioner who wants to update his surgical standards.

### Main selling points:

- All surgery basics in one book
- Instructive line drawings to illustrate surgical procedures
- State-of-the-art surgical standards for every veterinary practice
- Authored by more than 30 specialists from different European countries, representing their field of specialty

# Practical Haematology of the Dog and Cat

Japanese language rights not available.

Retail price: 60,00 €  
Publication date: 2003  
ISBN: 978-3-87706-743-7

## Author:

Reinhard Mischke, DVM, PhD, Diplomate of the European College of Veterinary Internal Medicine (ECVIM), University of Glasgow, Scotland. Specialist for Internal Medicine and Clinical Laboratory Diagnostic.

## Market:

Small animal practitioners, clinicians, veterinary students

## Specifications:

Hardcover, 19,5 x 26,0 cm, 216 pages, 93 large-sized colour photographs, 16 illustrations, 43 tables

## Contents:

This practice-oriented reference manual offers a detailed description on the clinically important aspects of haematology in the dog and cat. It covers different diagnostic procedures as well as advice for the interpretation of haematologic findings. It addresses the most important haematologic diseases of the dog and cat in detail.

The first two chapters give an introductory overview of the fundamentals of the physiologic development and morphology of the blood cell lines. Further diagnostic measures such as the examination of bone marrow and blood coagulation are explained. Tables and graphs for the interpretation of findings are a valuable help in ruling out different diseases. They facilitate diagnosis and therapy. This is followed by a discussion of all clinically relevant diseases (e. g. forms of anaemia, malignant lymphoma, leukaemias and coagulation disorders). The emphasis throughout is on diagnostic features, with information on aetiology, pathogenesis, diagnosis, prognosis and therapy. Excellent colour photographs demonstrate the physiologic haematopoietic cell lines, altered haemograms, lymph node cytology and bone marrow films. Literature references are given at the end of each chapter, a helpful glossary of terms completes this book.

## Main selling points:

- All clinical relevant haematologic diseases of the dog and cat
- Haematologic diagnostics and therapy in one book
- Practical tips for sample collection and all technical procedures in the haematologic lab
- Major clinical signs at one look
- Excellent colour pictures

# Practical Cytology in Veterinary Medicine

Retail price: 69,00 €  
Publication date: 2005  
ISBN: 978-3-89993-013-9

## Author:

Reinhard Mischke, DVM, PhD, Diplomate of the European College of Veterinary Internal Medicine (ECVIM), University of Glasgow, Scotland. Specialist for Internal Medicine and Clinical Laboratory Diagnostic.

## Market:

Veterinarians in small animal practices and mixed practices, veterinary students, veterinary technicians, laboratory technicians

## Specifications:

Hardcover, 19,5 x 26,0 cm, 208 pages, 150 large-sized colour photographs, 4 flow charts, 10 tables

## Contents:

This practice-oriented reference manual offers detailed description of all clinically important cytological techniques in veterinary medicine. It is a step-by-step guide to cytological diagnostics.

The main focus is on the detailed, species spanning description of cytological procedures (sample collection, preparation, examination and interpretation). Methodical procedures, materials, and techniques are explained. This is followed by an elaborate presentation of the cytology of inflammation and infection as well as malignancy criteria. A separate chapter presents a discussion of clinically important case studies.

Numerous excellent colour photographs demonstrate physiological findings and clinical relevant diseases of the most important organ systems and species.

Tables and graphs for the interpretation of findings are a valuable and methodic help in ruling out different diseases. Literature references for each chapter complete this book.

## Main selling points:

- Step-by-step guide to cytological diagnostics
- Practical tips for sample collection, preparation, examination, and interpretation
- Species spanning
- Malignancy criteria
- Inflammation and Infection
- Clinical relevant diseases and case studies
- Excellent colour photographs

## Radiographic Techniques – The Dog

English, Japanese, Polish and Spanish language rights not available.

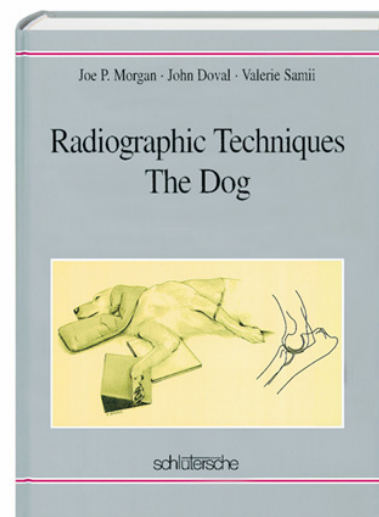

Retail price: 39,90 €  
Publication date: 1998  
ISBN: 978-3-87706-524-2

### Authors:

Joe P. Morgan, DVM, PhD, Professor em., University of California, Davis, School of Veterinary Medicine, Dept. of Radiological Science, USA

John Doval, Senior Medical Artist, USA

Val Samii, DVM, Dept. of Radiological Science, University of California, Davis, USA

### Market:

Small animal practitioners, veterinary students, veterinary assistants, animal health technicians, veterinary nurses

### Specifications:

14,8 x 21,0 cm, Hardcover, 268 pages, 200 drawings

### Contents:

The manual is divided into sections that illustrate positioning of the dog. The sections include the head, spine, thorax, abdomen, pelvis, forelimb, and hindlimb. Drawings of the resulting radiographs assist in understanding if the correct positioning has been obtained. The manual is written in a format that permits the technician to quickly find the page describing the view of interest and to quickly interpret the positioning and immobilization necessary to obtain the view.

### Main selling points:

- Radiographic positioning is required for obtaining high quality films
- High quality film needed for reliable diagnosis
- Techniques of patient immobilization for radiographic examination
- Techniques of patient positioning for radio-graphic examination
- Drawing of radiographs expected from each view
- Value of the book in drawings of radiographic positions and resulting radiographs

### Press commentaries:

“This book is an excellent resource in achieving maximum preparation for radiographic evaluation. It is appropriate for veterinarians, veterinary students and veterinary technicians”

Revue de Médecine Vétérinaire

“The book is very distinguished for the excellent drawings of each view, which make the description of the view much easier to follow while taking the radiograph.”

Israel Journal of Veterinary Medicine

## Hereditary Bone and Joint Diseases in the Dog

Osteochondroses ♦ Hip dysplasia ♦ Elbow dysplasia

English, Spanish and Japanese language rights not available.

Retail price: 76,00 €  
Publication date: 2000  
ISBN: 978-3-87706-548-8

### Author:

Joe P. Morgan, DVM, PhD, Professor em., UC Davis (UCD),  
Dept. of Surg. and Rad. Science, USA

### Contributors:

Alida Wind, DVM, UCD em. Surgeon, Dept. of Surg. and Rad.  
Science, USA

Autumn Davidson, DVM, UCD, Small Animal Clinic Vet. Med. Teach Hospital, USA

Lars Audell, DVM, Vet. Radiologist for Swedish Kennel Club, Sweden

### Market:

Small animal practitioners, breeders, owners of large breed dogs used as pets or working dogs

### Specifications:

Hardcover, 21,0 x 28,0 cm, 314 pages, 374 illustrations (mainly radiographs)

### Contents:

Skeletal dysplasia is discussed in all clinical relevant regions in the dog, e.g. shoulder, elbow hip, stifle, and tarsus from the standpoint of an individual owning a dog as a pet or working dog as well as from the standpoint of the breeder. Every single chapter provides information on the history, pathogenesis, diagnosis (physical and radiographic), therapy, and prognosis of a disease. The concept is completed and illustrated by the introduction of several clinical cases of osteochondrosis in the different anatomical locations. A report on research of these diseases in Labrador Retrievers adds valuable information on the affect of the diseases in a breed. The concluding chapter is most important in its discussion of the cost of these diseases within a breed and what control systems can be used to control them.

The book will help to diagnose skeletal dysplasia in dogs and thus, will be interesting for any small animal practitioner who is encharged of disease control within breeds.

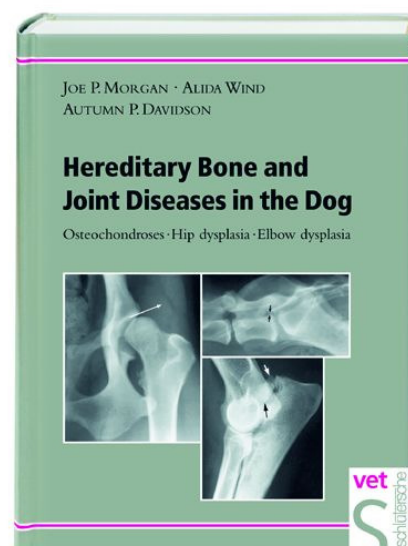

### Main selling points:

- History of osteochondrosis (OCD) and hip dysplasia in the dog
- Clearly presented discussion of humeral head OCD, elbow dysplasia, hip dysplasia, femoral condyle OCD, of the talus, lumbosacral disease
- Diseases presented, both, as they affect a single pet or as they affect a breed
- Each disease discussed as to clinical signs, radiographic diagnosis, conservative, medical and surgical treatment, prognosis
- Discussion of relevance and control of these diseases within a breed

### Press commentaries:

"The book is a real fund of information on screening system, and presents clear data on how they can work effectively in conjunction with support from breeders... I would thoroughly recommend this book to veterinary surgeons or dog breeding professionals who need an "in depth" understanding of the pathogenesis of hereditary disease"

The Veterinary Record

# Atlas of Radiology of the Traumatized Dog and Cat

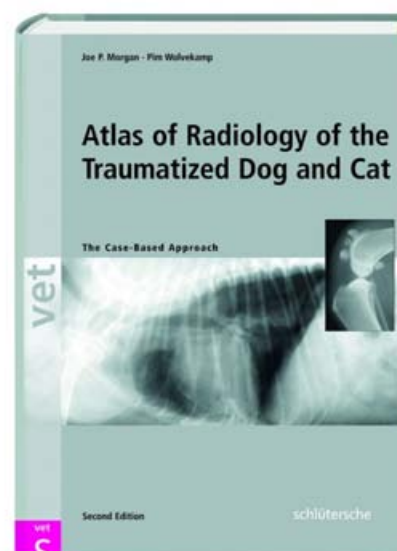

The Case-Based Approach

English language rights not available.

Retail price: 92,00 €  
Publication date: 2004 (2<sup>nd</sup> edition)  
ISBN: 978-3-89993-008-5

## Authors:

Joe P. Morgan, DVM, PhD, Professor e. m., University of California, Davis, School of Veterinary Medicine, Dept. of Radiological Sciences, USA  
Pim Wolvekamp, DVM, PhD, University of Utrecht, Faculty of Veterinary Medicine, Dept. of Radiology, Netherlands

## Market:

Veterinarians in small animal and mixed practices, clinicians, veterinary medicine students

## Specifications:

Hardcover, 21,0 x 28,0 cm, 568 pages, 790 illustrations (radiographs)

## Contents:

The book provides detailed instructions to the use of radiology in traumatized cat and dog patients. It is divided into three main chapters: thoracal, abdominal and musculoskeletal trauma. The first part of every chapter reviews the basics of radiological diagnosis. This is the first case-based approach of trauma radiology in small animals.

## Main selling points:

- Illustrated guide to better diagnoses of trauma
- Radiographs enable a better trauma treatment

### Press commentaries:

“The images in this text are exemplary and reproduction is of a high quality. There are multiple radiographs and presentations of a single condition, which realistically reflects the various presentations of the traumatised patient. It is a radiography atlas which would be useful tool for any veterinarian who does a lot of emergency work and a useful adjunct to a standard radiology textbook for any veterinary student.”

Veterinary Times

## Atlas of Diagnostic Ultrasonography in the Dog and Cat

English, Chinese, Italian, French, Japanese and Korean  
language rights not available.

Retail price: 154,00 €  
Publication date: 2006 (4<sup>th</sup> edition)  
ISBN: 978-3-89993-031-3

### Editors:

Cordula Poulsen Nautrup, DVM, PhD, University of Munich,  
Germany  
Ralf Tobias, DVM, cardiologist in specialized private clinic

With contributions of 26 authors from different German Universities and private practice.

### Market:

Small animal practitioners, clinicians, veterinary students, veterinarians with special interest in ultrasonography

### Specifications:

Hardcover, 24,5 x 34,3 cm, 400 pages, 1500 four-colour and black-and-white illustrations. Each ultrasonic image will be described by a corresponding line drawing.

### Contents:

All interesting applications of diagnostic ultra-sonography, including echocardiography, abdominal and pelvic sonography, and Doppler echography are shown in this atlas. Normal findings, physiological varieties, pathological alterations and courses of therapy will be described. Radiographs, including computed and microfocal tomographs, facilitate the interpretation of ultra-sound images. Each ultrasonic image will be described by a corresponding line drawing.

### Main selling points:

- A constantly increasing number of small animal practices use ultrasonography
- Ultrasonography is a valuable diagnostic tool beyond standard procedures
- Covers all applications and techniques of ultrasonography

## Colour Atlas of Falcon Medicine

Retail price: 94,00 €  
Publication date: 2004  
ISBN: 978-3-89993-007-8

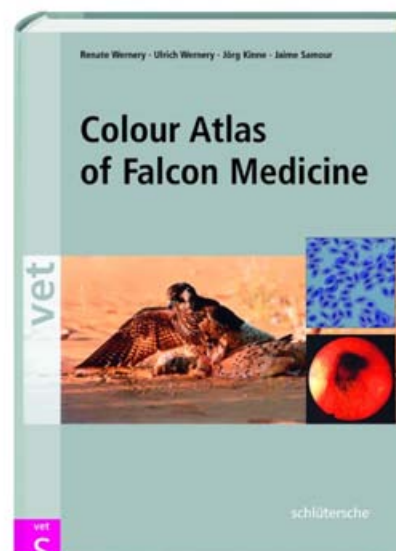

### Authors:

Priv. Doz. Dr. Dr. habil. Ulrich Wernery is a specialist for laboratory diagnostics in falcons. He is the Scientific Director of the Central Veterinary Research Laboratory in Dubai, U.A.E.

Renate Wernery is Head of the Virology Department of the Central Veterinary Research Laboratory in Dubai, U.A.E.

Dr. Jörg Kinne is Head of the Pathology Department of the Central Veterinary Research Laboratory in Dubai, U.A.E.

Dr. Jaime Samour is the Medical Director of the Fahad bin Sultan Falcon Center in Riyadh, Saudi Arabia.

### Market:

Veterinary practitioners (emphasis birds), laboratories, veterinary practitioners connected with falconries, falconers

### Specifications:

Hardcover, 21,0 x 27,5 cm, 144 pages, 378 illustrations, 31 tables

### Contents:

This book offers an extensive coverage of the most prevalent diseases occurring in falcons. It gives a valuable diagnostic overview over viral, bacterial, fungal, parasitic, and miscellaneous diseases, focussing on the most significant signs and alterations found in clinical presentations, gross-pathology and histopathology. One chapter revolves around haematology and blood chemistry of birds of prey which is of special interest since the authors have put meticulous effort into the establishment of haematological reference values.

### Main selling points:

- 378 high quality colour illustrations
- Covers most prevalent diseases in falcons and birds of prey
- Laboratory reference values for different falcon and hybrid species
- Laboratory guide: Haematological and blood biochemical profiles given for every described disease

### Press commentaries:

“Undoubtedly the strength of this book is the high quality images... they are superb and the book is worth purchasing for the images alone... an essential purchase”  
Falco Newsletter

## Behavioural Therapy of the Cat

Retail price: 49,00 €  
Publication date: 2003  
ISBN: 978-3-87706-891-5

## Behavioural Therapy of the Dog

Retail price: 52,00 €  
Publication date: 2005 (2<sup>nd</sup> edition)  
ISBN: 978-3-87706-674-4

### Author:

Wolf-Dieter Schmidt, DVM, is specialist for Behavioural Medicine in private practice in Wolfsburg, Germany.

### Market:

Small animal practitioners, veterinary students, veterinary technicians

### Specifications:

**Behavioural Therapy of the Cat:** Hardcover, 19,5 x 26,0 cm, 162 pages, 8 colour photographs

**Behavioural Therapy of the Dog:** Hardcover, 19,5 x 26,0 cm, 176 pages, 5 colour photographs

### Contents:

These practice-orientated books offer detailed descriptions of the most important behavioural problems of the dog and cat. They address precise practical instructions for the veterinary practitioner, in order to organize a behavioural consultation.

Overviews of the domestication and normal behaviour of the dog and cat are given. With the presentation of case studies from the authors longtime practical experience, the most common and important behavioural problems of these animals are described in detail (e. g. aggressions, phobias/anxieties, unclean habits/marketing habits). General and specific treatment options are explained step-by-step. The application of drugs supporting the behavioural therapy is indicated, including a tabular overview of usable drugs. Questionnaires for cat and dog owners as well as advice for using special training equipment are helping to organize a behavioural consultation. An ethological glossary completes these manuals.

### Main selling points:

- Presents the most common behavioural problems of the dog and cat
- Practice-orientated conception and case studies
- Step-by-step tips for organizing a behavioural consultation
- Author with longtime practical experience in behavioural medicine of small animals

## Market:

Veterinarians in clinics and practices, veterinary students

## Specifications:

Hardcover, 21,0 x 27,5 cm, 272 pages, 323 illustrations (228 four color, 95 line drawings)

## Contents:

- Diagnostics procedures and therapy basis
- Ocular emergencies
- Orbital and periorbital structures
- Lacrimal apparatus
- Eyelids
- Conjunctiva and nictitating membrane
- The globe
- Cornea and sclera
- Intraocular pressure and glaucoma
- Anterior uvea, lens and vitreous
- Fundus and optic nerve
- Breed predispositions and hereditary eye diseases

There are several detailed, highly specialized books and atlases on ophthalmology but there is a considerable lack of information directed to the veterinary student or the non-specialized practitioner. This book informs on the most important eye diseases and their diagnostic features. The book covers congenital anomalies, environmentally caused disorders, degenerative, autoimmune and neoplastic diseases and a separate chapter on ocular emergencies.

## Main selling points:

- Easy access to the most important eye diseases and disorders
- The most common encountered ocular problems receive the most detailed attention
- Separate chapter on primary ocular emergencies
- Excellent introduction into veterinary ophthalmology

### Press commentaries:

“To conclude, I highly recommend this book which gives in a minimum of words, the maximum of updated information to the practitioner and the student.”

## Handbook of Cholesterol Nutrition

Indulge yourself!

Retail price: 12,90 €  
Publication date: 2007  
ISBN: 978-3-89993-553-0

### Authors:

Sven-David Müller-Nothmann, dietitian and best selling book author  
Christiane Weißenberger, dietitian

### Market:

People with high cholesterol, general practitioners, alternative medical doctors, nutritionists, dietitians

### Specifications:

Softcover, 15,5 x 21,0 cm, 144 pages, 90 color photos

### Contents:

- The "good" and the "bad" cholesterol
- A healthy diet – in many cases still the best medicine
- Many advices for daily life
- Over 60 delicious recipes

Doctors advise millions of people with high cholesterol, on medications or not, to follow cholesterol-lowering diets. Yet patients often don't know what cholesterol is, where it comes from, or how to lower it through diet.

This book's introduction clearly explains cholesterol and how it relates to heart disease, factors that raise cholesterol levels, and other important issues. More than 60 recipes are guaranteed to please everyone, which makes eating for lower cholesterol easier and tastier than ever.

The authors lay out a nutritional program. Emphasizing that such a diet needn't be monotonous, the book offers a wide variety in cuisine.

Sections contain:

- Breakfasts
- Main dishes
- Snacks
- Soups and salads
- Desserts

### Main selling points:

- With dietary guidelines
- Over 60 delicious recipes

## Handbook of Liver and Gallbladder Nutrition

Indulge yourself!

Retail price: 12,90 €  
Publication date: 2008  
ISBN: 978-3-89993-549-3

### Authors:

Sven-David Müller-Nothmann, dietitian and  
best selling book author  
Christiane Weißenberger, dietitian

### Market:

Everybody who suffers from liver and gallbladder disorders,  
general practitioners, alternative medical doctors, nutritionists, dietitians

### Specifications:

Softcover, 15,5 x 21,0 cm, 156 Seiten, ca. 90 color photos

### Contents:

It is important that patients with liver and Gallbladder diseases maintain a balanced diet, which ensures adequate calories, carbohydrates, fats and proteins. Such a diet will aid the liver in the regeneration of liver cells. Nutrition that supports this regeneration is a means of treatment of some liver disorders. Beyond the maintenance of a good, well-balanced diet, several liver conditions require specific dietary management.

The authors lay out a nutritional program. Emphasizing that such a diet needn't be monotonous, the book offers over 60 recipes.

Also discussed are prescription and over-the-counter drugs and the roles they can play in treating certain conditions.

Consisting of 156 pages and over 60 recipes, it offers a wide variety in cuisine. Sections contain:

- Breakfasts
- Main dishes
- Snacks
- Soups and salads
- Desserts

### Main selling points:

- With dietary guidelines
- Over 50 delicious recipes

## Handbook of Osteoporosis Nutrition

Indulge yourself!

Retail price: 12,90 €  
Publication date: 2008  
ISBN: 978-3-89993-554-7

### Authors:

Sven-David Müller-Nothmann, dietitian and  
best selling book author  
Christiane Weißenberger, dietitian

### Market:

Everybody who suffers from osteoporosis, general practitioners,  
alternative medical doctors, nutritionists, dietitians

### Specifications:

Softcover, 15,5 x 21,0 cm, 132 pages, 90 colour photos

### Contents:

Once considered a progressive disease, osteoporosis can be prevented and/or treated with the right exercise program and the right nutrition.

An osteoporosis diet basically consists of three elements:

1. Calcium is required to support bone growth, bone healing and maintain bone strength.
2. Some studies have shown that a high intake of vitamin D reduces fractures.
3. It seems to be important to reduce the intake of foods that prevent us from building healthy bones. A combination of bread and cereals, fruit and vegetables, milk and dairy products, and protein from meat, fish, eggs, nuts and seeds provide the nutrients that your body needs.

This health guide provides up-to-date information on the risks, prevention, diagnosis and treatment of osteoporosis and gives an general overview how your diet can influence the health of your bones. It presents more than 60 tested recipes high in calcium, low in cholesterol, fat, and calories.

### Main selling points:

## Handbook of Rheumatic Disorder Nutrition

Indulge yourself!

Retail price: 12,90 €  
Publication date: 2007  
ISBN: 978-3-89993-525-7

### Authors:

Sven-David Müller-Nothmann, dietitian and best selling book author  
Christiane Weißenberger, dietitian

### Market:

Everybody who suffers from Rheumatic disorders, rheumatologists, general practitioners, alternative medical doctors, nutritionists, dietitians

### Specifications:

Softcover, 15,5 x 21,0 cm, 144 pages, 90 colour photos

### Contents:

The causes of most rheumatic diseases are still largely unknown and frequently involve several factors. Studies indicate that nutrition directly influences the course of joint rheumatism, especially rheumatoid arthritis. Changing eating habits can lessen the symptoms of this disease. The goal, above all, is to maintain a normal weight to avoid overloading the joints.

Certain ingredients in our food promote the inflammatory process. One, for example, is arachidonic acid. Among substances that reduce the inflammatory process are the antioxidants vitamins C and E, and beta-carotene; the minerals zinc and selenium; and the polyunsaturated omega-3 fatty acids. Whereas vitamins bind and neutralize free radicals, omega-3 fatty acids prevent the formation of inflammation mediators.

The authors lay out a nutritional program. Emphasizing that such a diet needn't be monotonous, the book offers a wide variety in cuisine.

Sections contain:

- Breakfasts
- Main dishes
- Snacks
- Soups and salads
- Desserts

### Main selling points:

## 50 healthiest and 50 most dangerous foods

Retail price: 12,90 €  
Publication date: 2007  
ISBN: 978-3-89993-555-4

### Author:

Sven-David Müller-Nothmann, dietitian and  
best selling book author

### Market:

Everybody who is interested in a healthy lifestyle, general  
practitioners, alternative medical doctors, nutritionists, dietitians

### Specifications:

Softcover, 15,5 x 21,0 cm, 152 pages, 90 photos

### Contents:

To choose the right foods can help you prevent or even heal diseases; they increase our energy-level  
and influence how we look. The wrong foods on the other hand can make you sick.

The author has checked nutritional fact-sheets, spoken to many experts and studied plenty of scientific  
publications. The result: A list of the 50 healthiest and 50 most dangerous foods.

You will learn that not every food is for all consumers equally dangerous. Want an example? Green  
beans are of course healthy, but if you eat them raw, they turn into poison. Or take milk: Milk is one of  
the healthiest foods, but about 10 Million people alone in Germany suffer from lactose intolerance, and  
for those people drinking milk causes a range of abdominal symptoms. The green spots on potatoes  
are poisonous ...And eggs, it is now known, are one of the healthiest foods ...

### Main selling point:

- Finally a list of the healthiest and most dangerous foods.

## Vegamin-Power

Bio-active substances in fruit and vegetables

Retail price: 12,90 €  
Publication date: 2007  
ISBN: 978-3-89993-535-6

### Authors:

Prof. Dr. Michael Hamm, nutritionist  
Monika Cremer, nutritionist and journalist  
Bettina Zeuch, product manager

### Market:

Everybody interested in nutrition topics, general practitioners, alternative medical doctors, nutritionists, dietitians

### Specifications:

Softcover, 15,5 x 21,0 cm, 192 pages, 156 photos, 11 tables

### Contents:

50 bio-active Substances to improve health and fitness  
Vegamins in grains, nuts and legumes  
Red wine, tea, coffee – wellness meets indulgence  
Vegamin cacao: good news for chocolate fans  
How to fight wrinkles with vegetables and fruit

Bio-active substances help us to stay healthy and fit. They protect us from illness and improve our overall well-being. Vegamins work in teams, as one part among others in foods. This guide provides an overview of the different vegamins and their bio-active substances. The authors explain in an easy to understand way how vegamins work and show latest scientific results.

### Main selling points:

- Vegamins – the vitamins for the 3rd millennium
- Market trend bio-active vaccines
- Professor Hamm is best selling author of many medical guides
- First book to provide an overview

### Pharmaceutical Sales:

3000 copies: Kampffmeyer Food Innovation

## Omega-3 active

Health from the ocean

Retail price: 9,90 €  
Publication date: 2007  
ISBN: 978-3-89993-527-1

### Authors:

Prof. Dr. Michael Hamm, nutritionist and best-selling author,  
Dirk Neuberger, nutritionist

### Market:

Everybody who is interested in a healthy living style, general practitioners, alternative medical doctors, nutritionists, dietitians

### Specifications:

Softcover, 15,5 x 21,0 cm, 96 pages, 80 photos

### Contents:

This easy-to-read book gives valuable information on how Omega-3-fatty acids work: They reduce inflammation throughout your body, keep your blood from clotting excessively, lower the amount of lipids (fats such as cholesterol and triglycerides) circulating in the bloodstream, inhibit thickening of the arteries by decreasing endothelial cells' production of a platelet-derived growth factor (the lining of the arteries is composed of endothelial cells), reduce the risk of becoming obese and improve the body's ability to respond to insulin by stimulating the secretion of leptin, a hormone that helps regulate food intake, body weight and metabolism, and is expressed primarily by adipocytes (fat cells), and help prevent cancer cell growth.

The authors provide a wide range of advices and background information on healthy nutrition. They show which foods are rich on fatty acids.

### Main selling points:

- A new trend in healthy living
- Easy-to-read in-depth medical information

### Pharmaceutical Sales:

1000 copies: Lonza AG  
1000 copies Gold-Ei Erzeugerverbund GmbH  
1000 copies Queisser GmbH & Co. KG

## Laser Eye Surgery

The ultimate therapy to vision correction

Retail price: 9,90 €  
Publication date: 2005  
ISBN: 978-3-89993-517-2

### Author:

Dr. med. Irmgard Huber, medical doctor, VisuMed AG  
Dr. med. Wolfgang Lackner, eye doctor and ophthalmologist

### Market:

Eye doctors, ophthalmologists, optometrists, opticians,  
general practitioners, surgeons

### Specifications:

Softcover, 15,5 x 21,0 cm, 84 pages, 47 colour illustrations

### Contents:

Each year more and more people opt to improve their eyesight with the 15-minute laser operation called LASIK. As the popularity of these surgeries grows, consumers are clamouring for answers to their questions and fears about the risks and benefits of these relatively new procedures.

Laser eye surgery answers every question about improving vision through corrective surgery. The authors guide you to the vital questions to ask both yourself and your potential surgeon. Using easy-to-understand-language this guide takes you through the entire laser eye surgery process. This book gives a realistic idea of what to expect before, during, and after surgery from the patient's and the surgeon's perspective.

Besides the emphasis on surgery the text provides basic information about the eyes such as how they function, why some eyes do not work so well, and how to understand your prescription for eyeglasses. The authors focus is on patient education, which is important to making an informed decision. Medical illustrations and a glossary help clarify medical concepts.

What are the differences between the procedures, and which is right for me?

What are the most common side effects of laser eye treatment?

Will the procedure be painful?

When can I fully resume normal daily activities such as driving and reading?

### Main selling points:

- All basic information about the eye
- Description of the entire laser process
- Detailed answers to all of your questions about risks and benefits, costs and possible tax reductions

### Pharmaceutical sales:

VisuMed AG, Munich, Germany

## Attention Deficit Disorders with Adults

The nutrient therapy

Retail price: 10,90 €  
Publication date: 2004  
ISBN: 978-3-89993-510-3

### Authors:

Prof. Dr. Michael Hamm, nutritionist  
Dr. med. Mirko Berger, general practitioner and anaesthesiologist,  
Center of Alternative Treatment of ADD

### Market:

General practitioners, internal specialists, nutritionists, homeopaths,  
alternative medical doctors

### Specifications:

Softcover, 15,5 x 21,0 cm, 80 pages, 50 colour illustrations

### Contents:

About half of all children with Attention Deficit Disorder (ADD) will continue to experience the symptoms throughout life. Records of diagnosis suggest that it occurs in approximately up to 6 % of adults. The impact of ADD on adult life can be profound. Negative characteristics include difficulty with maintaining attention or focus, with impulsivity, with organizing time or controlling your temper.

Research has shown that the brains of people with attention deficit disorder have several regions which are smaller than those brain regions of individuals without the disability. Additionally, there appears to be a various chemical levels and how the connections are made between nerves.

Symptoms are often treated with so called stimulants – a life long therapy, which, over years, can cause multiple side effects such as addiction or a permanent increase in the dosage.

Especially in England and the USA, a new drug therapy is administered that is based on nutrients. This therapy can reduce the core symptoms of ADD up to 20 %. This safe and simple method is introduced in all detail.

### Main selling points:

- A new, safe and simple method to treat ADD
- Prof. Michael Hamm is best selling author of many medical guides
- Detailed description of the clinical picture of ADD

New!

## Problem-based Learning – how good does it work?

Experiences and results

Retail price: 26,90 €  
Publication date: 2008  
ISBN: 978-3-89993-201-0

### Authors:

Prof. Dr. Ingrid Darmann-Finck, University of Bremen,  
Institut of Public Health  
Angela Boonen, Master of Medical Education

### Market:

Teachers in medical education

### Specifications:

Softcover, 17,3 x 24,5 cm, 160 pages

### Contents:

- Problem-based Learning
- Evidence-based Nursing
- How effective is problem-based Learning
- What do students think about the method
- The teacher and the educational method

The increasingly popular term 'problem-based learning' refers in this case to the education of Nurses. Groups of students work with a mentor who is skilled in collaborative learning and offers nursing information. During their course of study, students engage in a series of nursing cases that has been carefully designed to cover the field of common nursing issues. But what do students think about "problem-based learning"? And what can teachers learn about their educational work?

### Main selling points:

- A general overview about the Do's and Don'ts of Problem-based Learning
- First study of Problem-based Learning in Germany

New!

## “Greetings from Mummy...”

Keywords in the work with people with dementia

Retail price: 29,90 €  
Publication date: 2008  
ISBN: 978-3-89993-211-9

### Authors:

Margarete Schneberger, Social worker

Sonja Jahn, Nurse

Elfriede Marino, Nurse

### Market:

Care-professionals, researchers, nursing staff,  
social care workers, speech and language therapists

### Specifications:

Hardcover, 17, 3 x 24, 5 cm, 168 pages

### Contents:
